

PRACTICE LIST	SAR	Notes
<b>CONSULTATION</b>		
<b>Consultation Fee Dog</b>	150	Our standard consultation lasts 15 minutes, but we will always give you the time that you need with no increase in cost. The first time we see your pet for a problem, this fee covers the examination, diagnosis and treatment plan. Additional fees apply for add-on jobs like nail clips, further tests and drug treatments We strongly advise an annual health check for your cat. To maintain protection against these infectious diseases a yearly booster vaccine is required. Regular examinations of your pet allow us to pick up problems at an early stage.
<b>Consultation Fee Cat</b>	100	
<b>Consultation Bird</b>	100	
<b>Consultation Exotics</b>	75	
<b>Follow Up Cons Fee Dog</b>	75	
<b>Follow Up Cons Fee Cat</b>	75	If we see your pet for a follow-up consultation for the same problem, then a reduced consultation fee is applied. We strongly advise an annual health check for your pet.
<b>Follow Up Cons Fee Small Animal-Bird</b>	50	
<b>Emergency (After-Hours Surcharge)</b>	250	This fee covers the examination, diagnosis, and treatment plan. Additional fees apply for add-on jobs , further tests and drug treatments
<b>Kitten/Puppy Health Check</b>	100	We recommend an examination by a Veterinary Surgeon at the earliest opportunity after you have homed your new puppy. We would like you to know as soon as possible if there are any problems, and to help you care for your new puppy. We advise regular free checks with our Veterinary Nurses while your puppy is growing. At 6 months of age we advise an examination with a Veterinary Surgeon to assess growth and development and plan any neutering surgery.
<b>Vaccinations</b>		
<b>Rabies Vaccination 3y</b>	150	To maintain protection against these Rabies a yearly booster vaccine is required. Regular examinations of your cat allow us to pick up problems at an early stage
<b>Cat Vaccine 3 in 1</b>	150	
<b>Cat Vaccine 4 in 1</b>	150	
<b>Dog Vaccine DHPPiL</b>	150	
<b>Program anti-flea injection for Cats - Dogs</b>	100-350	Program is a very safe and effective means of flea control. By giving your cat an injection we can prevent fleas from breeding in your house for 6 months! We also get to see you and your cat which gives us the best opportunity to monitor health. We will send you reminders to advise when the injections are due. Program is also available as a monthly oral product for cats and dogs.
<b>Rabbit combined annual vaccine</b>	200	Rabbits can be vaccinated from 5 weeks of age to protect against myxomatosis and viral hemorrhagic disease. The immunity lasts for a year and annual 'booster' vaccinations are needed to maintain protection.
<b>Deworming Vaccination</b>	26	for 1tablet per 10 kg body weight

<b>Antifungal Vaccine</b>	150	
<b>Blood/ Laboratory WORK</b>		
<b>Complete Blood Count</b>	250	
<b>Chemistry Analysis</b>	350	
<b>Blood Pressure</b>	75	
<b>Blood Glucose</b>	100	
<b>Fecal Exam</b>	120	
<b>Virus Strip Snap Test</b>	120-250	
<b>OTHER</b>		
<b>Pet Passport</b>	50	If you wish to travel abroad with your pet it is necessary to have a pet passport. The price quoted includes microchip implantation, rabies vaccination and the issue of the pet passport document. The passport is valid for travel 3 weeks after the first rabies vaccine.
<b>Microchip implantation</b>	250	We advise that all your pets are identified by microchip. Implantation is safe and the chip provides a reliable form of permanent identification of your pet. This will help many cases of pets reunited with their owners which would not have happened
<b>Express Anal Glands</b>	40	
<b>Nail Trim</b>	50	
<b>I.V. Catheter &amp; I.V. Fluid Therapy</b>	120	This simple procedure will establish direct I.V. access to make it an easy and smooth process for anesthesia along with having I.V. access at any time in case of a medical emergency. I.V. Fluids are a beneficial part of your pet's surgery to go along with anesthesia because it helps keep the pet's blood pressure regulated and correct during anesthesia. This also will keep the patient hydrated as well and correct any dehydration process during the procedure.
<b>Euthanasia</b>	400	Hopeless cases only
<b>SURGERY</b>		
<b>Male Dog Neutering Surgery</b>	750-1500	We castrate dogs from Chihuahuas to Great Danes and our costs vary accordingly. Your dog needs to be starved in the morning and will come home that evening.
<b>Female Dog Neutering Surgery</b>	1200-2500	We spay bitches of all shapes and sizes and the cost varies accordingly. We continue to neuter bitches via a conventional mid-line laparotomy and ovariectomy, which we find safe, effective and comfortable for our patients. Your Veterinary Surgeon will discuss alternatives with you.
<b>Male Cat Neutering Surgery</b>	450-600	A routine procedure for us, if not for the cat. Your cat will come home in the evening and recovery is usually straightforward.
<b>Female Cat Neutering Surgery</b>	850-1200	We spay the girls early in the day and they recover quickly and are usually ready to go home in the evening. For your convenience you only have to come back for suture removal a week later.
<b>Male Rabbit Neutering Surgery</b>	600	Rabbits do not need to be starved prior to anesthesia. We give them a gaseous anesthesia with a tube in their windpipe. The anesthesia is very safe and recovery is swift. Your rabbit will come home in the evening and return for an early progress check after 1-2d and suture removal after a week.
<b>Female Rabbit Neutering Surgery</b>	900	Rabbits do not need to be starved prior to anesthesia. We give them a premed then a gas anesthesia with a tube in their windpipe or another device that maintains an airway. The anesthesia is very safe and recovery is swift. Your rabbit will come home in the evening with some pain relief for the first few days and return for an early progress check after 1-2d and suture removal after a week.
<b>Wound Repair SMALL (less than 2 inches)</b>	300	Wounds have many causes, sizes, and locations. They are usually treated by cleaning, debriding (removal of damaged tissue), and closing/suturing the wound. A drain may be placed in a wound if there is concern for fluid build-up under the skin. Instructions for care will be sent home with you.

Wound Repair MEDIUM (2 – 5 inches)	500
Wound Repair LARGE (greater than 5 inches)	700
